Vision System

FH-Series

Easier to Embed in Machine, **Shorter Machine Cycle Times**

- Calculations are easy to set for the results from four parallel tasks.
- Synchronous control of devices connected via EtherCAT is possible.
- The new Shape Search III processing item enables fast, precise, and stable measurements.
- Microsoft® .NET is supported to share machine interface with PC.
- User interface customization is supported.

System configuration

EtherCAT connections for FH series

Example of the FH Sensor Controllers (4-camera type) шшшш Sysmac Studio Standard Edition Machine Automation Vision Edition Controller NJ series EtherCAT junction slaves Lighting Controllers External Lightings Vision System EtherCAT Cables *1 FH Sensor Controllers special cable for cameras Ethernet Cables *2 Incremental rotary encoder special cable for LCD Monitor and DVI-I -RGB Conversion Connector Another slave (With built-in EtherCAT slave function) EtherCAT Cables * special cable for I/O LCD Monitor Trigger input PLC for I/O control sensor Lighting Controllers

*1. To use STP (shielded twisted-pair) cable of category 5 or higher with double shielding (braiding and aluminum foil tape) for EtherCAT and RJ45 connector.
*2. To use STP (shielded twisted-pair) cable of category 5 or higher for Ethernet and RJ45 connector.

EtherNet/IP, No-protocol Ethernet and PLC Link Connections for FZ5 series

Example of the FZ5 Sensor Controllers (4-camera type)

^{*} To use Straight or cross STP (shielded twisted-pair) cable of category 5 or higher for Ethernet and RJ45 connector

Cables

Item	Descriptions	Model
19	Camera Cable Cable length: 2 m, 5 m, or 10 m *2	FZ-VS
/9	Bend resistant Camera Cable Cable length: 2 m, 5 m, or 10 m *2	FZ-VSB
9	Right-angle Camera Cable *1 Cable length: 2 m, 5 m, or 10 m *2	FZ-VSL
/9	Long-distance Camera Cable Cable length: 15 m *2	FZ-VS2
0	Long-distance Right-angle Camera Cable Cable length: 15 m *2	FZ-VSL2
	Cable Extension Unit Up to two Extension Units and three Cables can be connected. (Maximum cable length: 45 m *2)	FZ-VSJ
.9	Monitor Cable Cable length: 2 m or 5 m (When you connect a LCD Monitor FZ-M08 to FH sensor controller, please use it in combination with a DVI-I -RGB Conversion Connector FH-VMRGB.)	FZ-VM
7	DVI-I -RGB Conversion Connector For FH Series only	FH-VMRGB
19	Parallel I/O Cable Cable length: 2 m or 5 m, For FZ Series only	FZ-VP
. 9	Parallel I/O Cable for Connector-terminal Conversion Unit Cable length: 2 m or 5 m, For FZ Series only Connector-Terminal Block Conversion Units can be connected (Terminal Blocks Recommended Products: OMRON XW2R-J50G-T, XW2R-E50G-T, XW2R-P50G-T)	FZ-VPX
-9	Parallel I/O Cable *3 Cable length: 2 m or 5 m, For FH Series only	XW2Z-S013-2/-S013-5
/0)	Encoder Cable for line-driver Cable length: 1.5 m, For FH Series only	FH-VR

 ^{*1} This Cable has an L-shaped connector on the Camera end.
 *2 The maximum cable length depends on the Camera being connected, and the model and length of the Cable being used. For further information, please refer to the "Cameras / Cables" table.
 When a high-speed CMOS camera FH-S_02/-S_04 is used in the high speed mode of transmission speed, two camera cables are required.
 *3 2 Cables are required for all I/O signals.

Recommended EtherCAT and EtherNet/IP Communications Cables
Use Straight STP (shielded twisted-pair) cable of category 5 or higher with double shielding (braiding and aluminum foil tape) for EtherCAT.
Use Straight or cross STP (shielded twisted-pair) cable of category 5 or higher for EtherNet/IP.

Item		Descriptions			Model

	I OI LUIGINGUIF	Pairs: 0.5 mm, 4-pair Cable	RJ45 Connectors	Panduit Corporation	MPS588 *6				

Note: Please be careful while cable processing, for EtherCAT, connectors on both ends should be shield connected and for EtherNet/IP, connectors on only one end should be shield connected.

- The FH series supports the EtherCAT communication. It cannot be used in FZ series.

 The lineup features Low Smoke Zero Halogen cables for in-cabinet use and PUR cables for out-of-cabinet use.

 For details, refer to Cat.No.G019.

 We recommend you to use above cable for EtherCAT and EtherNet/IP, and RJ45 Connector together.

 We recommend you to use above cable for EtherCAT and EtherNet/IP, and RJ45 Assembly Connector together.

 We recommend you to use above cable For EtherNet/IP and RJ45 Connectors together.

The image logging capacity changes when multiple cameras of different types are connected at the same time.

The current consumption when the maximum number of cameras supported by each controller are connected.

If a strobe controller model is connected to a lamp, the current consumption is as high as when an intelligent camera is connected.

FZ5 Sensor Controllers

The image logging capacity changes when multiple cameras of different types are connected at the same time.

Do not ground the positive terminal of the 24-VDC power supply to a Lite Controller.

If the positive terminal is grounded, electrical shock may occur when an SG (0-V) part, such as the case of the Controller or Camera, is touched. The current consumption when the maximum number of cameras supported by each controller are connected.

If a strobe controller model is connected to a lamp, the current consumption is as high as when an intelligent camera is connected.

Ratings and Specifications (LCD Monitor, Cable)

LCD Monitor

Model	FZ-M08
Size	8.4 inches
Туре	Liquid crystal color TFT
Resolution	1,024 × 768 dots
Input signal	Analog RGB video input, 1 channel
Power supply voltage	21.6 to 26.4 VDC
Current consumption	Approx. 0.7 A max.
Ambient temperature range	Operating: 0 to 50 °C; Storage: -25 to 65 °C (with no icing or condensation)
Ambient humidity range	Operating and storage: 35 to 85% (with no condensation)
Weight	Approx. 1.2 kg
Accessories	Instruction Sheet and 4 mounting brackets

Camera Cables

Model	FZ-VS (2 m)	FZ-VSL (2 m)					
Shock resistiveness (durability)	10 to 150 Hz single strokes, 4 times	10 to 150 Hz single amplitude 0.15 mm 3 directions, 8 strokes, 4 times					
Ambient temperature range	Operation and storage: 0 to 65 °C (with no icing or condensation)						
Ambient humidity range	Operation and storage: 40 to 70%RH (with no condensation)						
Ambient atmosphere	No corrosive gases						
Material	Cable sheath, connector: PVC						
Minimum bending radius	69 mm 69 mm 69 mm						
Weight	Approx. 170 g Approx. 220 g Approx. 170 g						

Monitor Cable

Model	FZ-VM
Vibration resistiveness	10 to 150 Hz single amplitude 0.15 mm 3 directions, 8 strokes, 4 times
Ambient temperature range	Operation: 0 to 50 °C; Storage: -20 to 65 °C (with no icing or condensation)
Ambient humidity range	Operation and storage: 35 to 85%RH (with no condensation)
Ambient atmosphere	No corrosive gases
Material	Cable sheath: heat-resistant PVC Connector: PVC
Minimum bending radius	75 mm
Weight	Approx. 170 g

Cable Extension Unit

Model	FZ-VSJ
Power supply voltage *1	11.5 to 13.5 VDC
Current con- sumption *2	1.5 A max.
Ambient temperature range	Operating: 0 to 50 °C; Storage: -25 to 65 °C (with no icing or condensation)
Ambient humidity range	Operating and storage: 35 to 85% (with no condensation)
Maximum Units connectable	2 Units per Camera
Weight	Approx. 240 g
Accessories	Instruction Sheet and 4 mounting screws

^{*1} A 12-VDC power supply must be provided to the Cable Extension Unit when connecting the Intelligent Camera, the Autofocus Camera, the Intelligent Compact Camera, the Strobe Controller, or the Lighting Controller.

Long-distance Camera Cables

Model	FZ-VS2 (15 m)	FZ-VSL2 (15 m)				
Shock resistiveness (durability)	10 to 150 Hz single amplitude strokes, 4 times	0.15 mm 3 directions, 8				
Ambient temperature range	Operation and storage: 0 to 6 (with no icing or condensation					
Ambient humidity range	Operation and storage: 40 to 70%RH (with no condensation)					
Ambient atmosphere	No corrosive gases					
Material	Cable sheath, connector: PVC					
Minimum bending radius	93 mm					
Weight	Approx. 1600 g					

Parallel Cable

FZ-VP FZ-VPX					
10 to 150 Hz single amplitude 0.15 mm 3 directions, 8 strokes, 4 times					
Operation: 0 to 50 °C; Storage: -20 to 65 °C (with no icing or condensation)					
Operation and storage: 35 to 85%RH (with no condensation)					
No corrosive gases					
Cable sheath: heat-resistant PVC Connector: resin					
75 mm					
Approx. 160 g Approx. 180 g					
	10 to 150 Hz single amplitude strokes, 4 times Operation: 0 to 50 °C; Storag (with no icing or condensation) Operation and storage: 35 to (with no condensation) No corrosive gases Cable sheath: heat-resistant				

Note: FZ-VP/FZ-VPX is only for the FZ series. The FH series can use XW2Z-S013-2/-S013-5.

Encoder Cable

Model	FH-VR
Vibration resistiveness	10 to 150 Hz single amplitude 0.1 mm 3 directions, 8 strokes, 10 times
Ambient temperature range	Operation: 0 to 50 °C; Storage: -10 to 60 °C (with no icing or condensation)
Ambient humidity range	Operation and storage: 35 to 85%RH (with no condensation)
Ambient atmosphere	No corrosive gases
Material	Cable Jacket: Heat, oil and flame resistant PVC Connector: polycarbonate resin
Minimum bending radius	65 mm
Weight	Approx. 104 g

Controller.

EtherCAT Communications Specifications

Item		Specifications				
Communications standard		IEC61158 Type 12				
Physical layer		100 BASE-TX (IEEE802.3)				
Modulation		Base band				
Baud rate		100 Mbps				
Topology		Depends on the specifications of the EtherCAT master.				
Transmission Media		Twisted-pair cable of category 5 or higher (double-shielded straight cable with aluminum tape and braiding)				
Transmission Distance		Distance between nodes: 100 m or less				
Node address setting		00 to 9				
External connection terminals	3	RJ45 × 2 (shielded) IN: EtherCAT input data, OUT: EtherCAT output data				
Send/receive PDO data sizes	Input	56 to 280 bytes/line (including input data, status, and unused areas) Up to 8 lines can be set. *				
Seliu/leceive FDO data sizes	Output	28 bytes/line (including output data and unused areas) Up to 8 lines can be set. *				
Mailbox data size	Input	512 bytes				
Walibox data SIZE	Output	512 bytes				
Mailbox		Emergency messages, SDO requests, and SDO information				
Refreshing methods		I/O-synchronized refreshing (DC)				

^{*} This depends on the upper limit of the master.

Version Information

FH Series and Programming Devices

	Required Programming Device		
FH Series	Sysmac Studio Standard Edition/Vision Edition		
	Ver.1.06	Ver.1.07 or higher	
FH-3050 (-□) FH-1050 (-□)	Not supported	Supported	

Note: 1. The auto-update to Sysmac Studio version 1.07 will be available soon.
2. Sysmac Studio does not support the FZ5 Series.

Components and Functions

Example of the FH Sensor Controllers
BOX type
(4-camera type)

	Name	Description
[1]	POWER LED	Lit while power is ON.
[2]	ERROR LED	Lit when an error has occurred.
[3]	RUN LED	Lit while the controller is in Measurement Mode.
[4]	ACCESS LED	Lit while the memory is accessed.
[5]	SD POWER LED	Lit while power is supplied to the SD card and the card is usable.
[6]	SD BUSY LED	Blinks while the SD memory card is accessed.
[7]	EtherCAT RUN LED	Lit while EtherCAT communications are usable.
[8]	EtherCAT LINK/ACT IN LED	Lit when connected with an EtherCAT device, and blinks while performing communications.
[9]	EtherCAT LINK/ACT OUT LED	Lit when connected with an EtherCAT device, and blinks while performing communications.
[10]	EtherCAT ERR LED	Lit when EtherCAT communications have become abnormal.
[11]	EtherNet NET RUN1 LED	Lit while EtherNet communications are usable.
[12]	EtherNet NET LINK/ACK1 LED	Lit when connected with an EtherNet device, and blinks while performing communications.
[13]	EtherNet NET RUN2 LED	Lit when EtherNet communications are usable.
[14]	EtherNet NET LINK/ACK2 LED	Lit when connected with an EtherNet device, and blinks while performing communications.

	Name	Description
Α	SD memory card installation connector	Install the SD memory card. Do not plug or unplug the SD card during measurement operation. Otherwise measurement time may be affected or data may be destroyed.
В	EtherNet connector	Connect an EtherNet device.
С	USB connector	Connect a USB device. Do not plug or unplug it during measurement operation. Otherwise measurement time may be affected or data may be destroyed.
D	RS-232C connector	Connect an external device such as a programmable controller.
Е	DVI-I connector	Connect a monitor.
F	I/O connector (control lines, data lines)	Connect the controller to external devices such as a sync sensor and PLC.
G	EtherCAT address setup volume	Used to set a node address (00 to 99) as an EtherCAT communication device.
Н	EtherCAT communication connector (IN)	Connect the opposed EtherCAT device.
I	EtherCAT communication connector (OUT)	Connect the opposed EtherCAT device.
J	Encoder connector	Connect an encoder.
K	Camera connector	Connect cameras.
L	Power supply terminal connector	Connect a DC power supply. Wire the controller independently on other devices. Wire the ground line. Be sure to ground the controller alone. Perform wiring using the attached power supply connector.

[3]	ERROR LED	Lit when an error has occurred.
[4]	I/O connector (control lines, data lines)	Connect the controller to external devices such as a sync sensor and PLC.
[5]	Camera connector	Connect cameras.
[6]	Power	Connect a DC power supply. Wire the power supply unit independently of other devices. After wiring, replace the terminal cover.
[7]	Ground terminal	Connect the ground wire. Make sure that the controller is grounded with a separate ground wire.
[8]	Monitor connector (analog RGB)	Connect a monitor. (Provided with Lite controller type only)
[9]	RS-232C/RS-422 connector	Connect an external device such as a personal computer or PLC.
[10]	USB connector	Connect a track ball, mouse and USB memory. A total of four USB ports are provided and any of them can be used. However, when connecting two or more USB memories, do not connect them to adjacent ports. Doing so may cause the USB memories to come into contact, resulting in malfunction or damage.
[11]	EtherNet connector	Connect the controller to a personal computer.
[12]	Touch pen (holder)	A touch pen is stored. (Provided with the LCD integrated type only)

Processing Items

Group	Icon		Processing Item	Corresponding Page in the Catalog
	å	Search	Used to identify the shapes and calculate the position of measurement objects.	P16
150 150 150 150	803	Flexible Search	Recognizing the shapes of workpieces with variation and detecting their positions.	P16
	· U	Sensitive Search	Search a small difference by dividing the search model in detail, and calculating the correlation.	P16
	*	ECM Search	Used to search the similar part of model form input image. Detect the evaluation value and position.	P16
	-	EC Circle Search	Extract circles using "round " shape information and get position, radius and quantity in high preciseness.	P16
	Å	Shape Search II	Used to search the similar part of model from input image regardless of environmental changes. Detect the evaluation value and position.	P16
	Å	Shape Search III	Robust detection of positions is possible at high-speed and with high precision incorporating environmental fluctuations, such as differences in individual shapes of the workpieces, pose fluctuations, noise superimposition and shielding.	P16
		EC Corner	This processing item measures a corner position (corner) of a workpiece.	P16
	***	Ec Cross	The center position of a crosshair shape is measured using the lines created by the edge information on each side of the crosshair.	P16
	3	Classification	Used when various kinds of products on the assembly line need to be sorted and identified.	P17
	+	Edge Position	Measure position of measurement objects according to the color change in measurement area.	P16
	UUU	Edge Pitch	Detect edges by color change in measurement area. Used for calculating number of pins of IC and connectors.	P16
	#	Scan Edge Position	Measure peak/bottom edge position of workpieces according to the color change in separated measurement area.	P16
	=	Scan Edge Width	Measure max/min/average width of workpieces according to the color change in separated measurement area.	P16
Inspections / Measurement	Q	Circular Scan Edge Position	Measure center axis, diameter and radius of circular workpieces.	P16
Measurement	Q	Circular Scan Edge Width	Measure center axis, width and thickness of ring workpieces.	P16
		Intersection	Calculate approximate lines from the edge information on two sides of a square workpiece to measure the angle formed at the intersection of the two lines.	P16
	*	Color Data	Used for detecting presence and mixed varieties of products by using color average and deviation.	P17
		Gravity and Area	Used to measure area, center of gravity of workpices by extracting the color to be measured.	P17
		Labeling	Used to measure number, area and gravity of workpieces by extracting registered color.	P17
		Label Data	Selecting one region of extracted Labeling, and get that measurement. Area and Gravity position can be got and judged.	
	M	Defect	Used for appearance measurement of plain-color measurement objects such as defects, stains and burrs.	P17
	A	Precise Defect	Check the defect on the object. Parameters for extraction defect can be set precisely.	P17
		Fine Matching	Difference can be detected by overlapping and comparing (matching) registered fine images with input images.	P16
	AB	Character Inspect	Recognize character according correlation search with model image registered in [Model Dictionary].	P17
	08-02-1	Date Verification	Reading character string is verified with internal date. Register character pattern as	P17
	A	Model Dictionary	dictionary. The pattern is used in [Character Inspection].	
	X	2DCode *2	Recognize 2D code and display where the code quality is poor.	P17
	Ш	Barcode *1	Recognize barcode, verify and output decoded characters.	P17
	•	Circle Angle	Used for calculating angle of inclination of circular measurement objects.	P17
		Glue Bead Inspection	You can inspect coating of a specified color for gaps or runoffs along the coating path.	P17
Image		Camera Image Input	To input images from cameras. And set up the conditions to input images from cameras.	
Capturing	噢	Camera Image Input FH	This is a processing item specific to the FH Sensor Controller to input images from high-speed cameras.	

Group	Icon	Processing Item		Corresponding Page in the Catalog
	9	Camera Image Input HDR	Create high-dynamic range images by acquiring several images with different conditions.	
Image Capturing	Life	Camera Image Input HDRLite	HDR function for FZ-SQ□ Intelligent Compact Cameras.	
	•	Camera Switch	To switch the cameras used for measurement. Not input images from cameras again.	
		Measurement Image Switching	To switch the images used for measurement. Not input images from camera again.	
	×	Position Compensation	Used when positions are differed. Correct measurement is performed by correcting position of input images.	P18
		Filtering	Used for processing images input from cameras in order to make them easier to be measured.	P18
		Backgrond Suppression	To enhance contrast of images by extracting color in specified brightness.	P18
	1	Brightness Correct Filter	Track brightness change of entire screen and remove gradual brightness change such as uneven brightness.	P18
		Color Gray Filter	Color image is converted into monochrome images to emphasize specific color.	P18
		Extract Color Filter	Convert color image to color extracted image or binary image.	P18
	1	Anti Color Shading	To remove the irregular color/pattern by uniformizing max.2 specified colors.	P18
Correcting images		Stripes Removal Filter II	Remove the background pattern of vertical, horizontal and diagonal stripes.	P18
	ABC	Polar Transformation	Rectify the image by polar transformation. Useful for OCR or pattern inspection printed on circle.	P18
	4	Trapezoidal Correction	Rectify the trapezoidal deformed image.	P18
	4-/	Machine Simulator	How the alignment marks would move on the image when each stage or robot axis is controlled can be checked.	
		Image Subtraction	The registered model image and measurement image are compared and only the different pixels are extracted and converted to an image.	
		Advanced filter	Process the images acquired from cameras in order to make them easier to measure. This processing item consolidates existing image conversion filtering into one processing item and adds extra functions.	P19
		Panorama	Combine multiple image to create one big image.	P18
	00	Macro	Advanced arithmetic processing can be easily incorporated into workflow as macro processing items.	P20
	00	Macro Calculation	This function is convenient when the user wants to calculate a value using an original calculation formula or change the set value or system data of a processing item.	P20
	ABC	Calculation	Used when using the judge results and measured values of ProcItem which are registered in processing units.	
	* +	Line Regression	Used for calculating regression line from plural measurement coodinate.	
	O	Circle Regression	Used for calculating regression circle from plural measurement coordinate.	
		Precise Calibration	Used for calibration corresponding to trapezoidal distortion and lens distortion.	P15
	User	User Data	Used for setting of the data that can be used as common constants and variables in scene group data.	P21
Assisting		Set Unit Data	Used to change the ProcItem data (setting parameters,etc.) that has been set up in a scene.	
inspections / measurement	<u>₽</u>	Get Unit Data	Used to get one data (measured results, setting parameters,etc.) of ProcItem that has been set up in a scene.	
		Set Unit Figure	Used for re-setting the figure data (model, measurement area) registered in an unit.	
_	(1)	Get Unit Figure	Used for get the figure data (model, measurement area) registered in an unit.	
		Trend Monitor	Used for displaying the information about results on the monitor, facilitating to avoid NG and analyze causes.	P21
	2 5	Image Logging	Used for saving the measurement images to the memory and USB memory.	
		Image Conversion Logging	Used for saving the measurement images in JPEG and BMP format.	
	54	Data Logging	Used for saving the measurement data to the memory and USB memory.	
	٥	Elapsed Time	Used for calculating the elapsed time since the measurement trigger input.	
	X	Wait	Processing is stopped only at the set time. The standby time is set by the unit of [ms].	

Group	Icon		Processing Item	Corresponding Page in the Catalog
	4	Focus	Focus setting is supported.	P15
	*	Iris	Focus and aperture setting is supported.	P15
	0000	Parallelize	A part of the measurement flow is divided into two or more tasks and processed in parallel to shorten the measurement time. This processing item is placed at the top of processing to be performed in parallel.	
	Ja 000	Parallelize Task	A part of the measurement flow is divided into two or more tasks and processed in parallel to shorten the measurement time. This processing item is placed immediately before processing to be performed in parallel between Parallelize and Parallelize End.	
		Statistics	Used when you need to calculate an average of multiple measurement results.	
Assisting inspections / measurement	be the	Referrence Calib Data	Calibration data and distortion compensation data held under other processing items can be referenced.	
		Position Data Calculation	The specified position angle is calculated from the measured positions.	P14
	41	Stage Data	Sets and stores data related to stages.	
	<u> </u>	Robot Data	Sets and stores data related to robots.	
		Vision Master Calibration	This processing item automatically calculates the entire axis movement amount of the control equipment necessary for calibration.	P15
	4	PLC Mastoer Calibration	Calibration data is created using a communication command from PLC.	P15
	ز	Convert Position Data	The position angle after the specified axis movement is calculated.	P14
-	4/	Movement Single Position	The axis movement that is required to match the measured position angle to the reference position angle is calculated.	P14
	112/	Movement Multi Points	The axis movements that are required to match the measured position angles to the corresponding reference position angles are calculated.	P14
	+	Detection Point	Obtains position/angle information by r eferring to the coordinate values measured with the Measurement Processing Unit.	
		Camera Calibration	By setting the camera calibration, the measurement result can be converted and output as actual dimensions.	P15
	#	Data Save	The set data can be saved in the controller main unit or as scene data. The data is held even after the FH/FZ power is turned off.	

Group	Icon	Processing Item		Page in the Catalog
	CO CO	Conditional Branch	Used where more than two kinds of products on the production line need to detected separately.	
	\$3	End	This ProcItem must be set up as the last processing unit of a branch.	
	1 2	DI Branch	Same as ProcItem "Branch". But you can change the targets of conditional branching via external inputs.	
Branching	- D-D-B	Control Flow Normal	Set the measurement flow processing into the wait state in which the specific no-protocol command can be executed.	
processing	0-0-0	Control Flow PLC Link	Set the measurement flow processing into the wait state in which the specific PLC Link command can be executed.	
	000	Control Flow Parallel	Set the measurement flow processing into the wait state in which the specific parallel command can be executed.	
	4	Control Flow Fieldbus	Set the measurement flow processing into the wait state in which the specific Fieldbus command can be executed.	
	SHITCH	Selective Branch	Easily branch to multiple destinations.	
Outputting results	Ш	Data Output	Used when you need to output data to the external devices such as PLC or PC via serial ports.	
		Parallel Data Output	Used when you need to output data to the external devices such as PLC or PC via parallel ports.	
		Parallel Judgement Output	Used when you need to output judgement results to the external devices such as PLC or PC via parallel ports.	
		Fieldbus Data Output	Outputs data to an external device, such as a Programmable Controller, through a fieldbus interface.	
Displaying results on the monitor	000	Result Display	Used for displaying the texts or the figures in the camera image.	
		Display Image File	Display selected image file.	
		Display Last NG Image	Display the last NG images.	

*1 Bar Codes that can be read : JAN/EAN/UPC (including add-on codes), Code 39, Codabar (NW-7), ITF (Interleaved 2 of 5), Code 93, Code 128, GS1-128, GS1 DataBar (RSS-14 / RSS Limited / RSS Expanded), Pharmacode

*2 2D Codes that can be read : Data Matrix (ECC200), QR Code

Meaning of Optical Chart

The X axis of the optical chart shows the field of vision (mm) (*1), and the Y axis of the optical chart shows the camera installation distance (mm) (*2).

Field of vision

*1. The lengths of the fields of vision given in the optical charts are the lengths of the Y axis.

*2. The vertical axis represents WD for small cameras.

Intelligent CCD Cameras, Autofocus CCD Cameras

Field of Vision of Intelligent Cameras and Autofocus Cameras
The images displayed on the monitor will be rectangular images of 640×480 pixels.
The valid processing area for measurements is the 480×480-pixel area in the middle.
The above figures show the dimensions of the middle 480×480 pixels.

Terms and Conditions Agreement

Read and understand this catalog.

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

Warranties.

- (a) Exclusive Warranty. Omron's exclusive warranty is that the Products will be free from defects in materials and workmanship for a period of twelve months from the date of sale by Omron (or such other period expressed in writing by Omron). Omron disclaims all other warranties, express or implied.
- (b) Limitations. OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, ABOUT NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OF THE PRODUCTS. BUYER ACKNOWLEDGES THAT IT ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE.

Omron further disclaims all warranties and responsibility of any type for claims or expenses based on infringement by the Products or otherwise of any intellectual property right. (c) Buyer Remedy. Omron's sole obligation hereunder shall be, at Omron's election, to (i) replace (in the form originally shipped with Buyer responsible for labor charges for removal or replacement thereof) the non-complying Product, (ii) repair the non-complying Product, or (iii) repay or credit Buyer an amount equal to the purchase price of the non-complying Product; provided that in no event shall Omron be responsible for warranty, repair, indemnity or any other claims or expenses regarding the Products unless Omron's analysis confirms that the Products were properly handled, stored, installed and maintained and not subject to contamination, abuse, misuse or inappropriate modification. Return of any Products by Buyer must be approved in writing by Omron before shipment. Omron Companies shall not be liable for the suitability or unsuitability or the results from the use of Products in combination with any electrical or electronic components, circuits, system assemblies or any other materials or substances or environments. Any advice, recommendations or information given orally or in writing, are not to be construed as an amendment or addition to the above warranty.

See http://www.omron.com/global/ or contact your Omron representative for published information.

Limitation on Liability; Etc.

OMRON COMPANIES SHALL NOT BE LIABLE FOR SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR PRODUCTION OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED IN CONTRACT, WARRANTY, NEGLIGENCE OR STRICT LIABILITY.

Further, in no event shall liability of Omron Companies exceed the individual price of the Product on which liability is asserted.

Suitability of Use.

Omron Companies shall not be responsible for conformity with any standards, codes or regulations which apply to the combination of the Product in the Buyer's application or use of the Product. At Buyer's request, Omron will provide applicable third party certification documents identifying ratings and limitations of use which apply to the Product. This information by itself is not sufficient for a complete determination of the suitability of the Product in combination with the end product, machine, system, or other application or use. Buyer shall be solely responsible for determining appropriateness of the particular Product with respect to Buyer's application, product or system. Buyer shall take application responsibility in all cases.

NEVER USE THE PRODUCT FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY OR IN LARGE QUANTITIES WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCT(S) IS PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

Programmable Products.

Omron Companies shall not be responsible for the user's programming of a programmable Product, or any consequence thereof.

Performance Data.

Data presented in Omron Company websites, catalogs and other materials is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of Omron's test conditions, and the user must correlate it to actual application requirements. Actual performance is subject to the Omron's Warranty and Limitations of Liability.

Change in Specifications.

Product specifications and accessories may be changed at any time based on improvements and other reasons. It is our practice to change part numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the Product may be changed without any notice. When in doubt, special part numbers may be assigned to fix or establish key specifications for your application. Please consult with your Omron's representative at any time to confirm actual specifications of purchased Product.

Errors and Omissions.

Information presented by Omron Companies has been checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical or proofreading errors or omissions.
